The Medical Practice Manager™

THE TOTAL SOLUTION FOR MANAGING YOUR PRACTICE

The ICS Medical Practice Manager is a comprehensive software program that provides you with a total solution to all your practice needs, including patient scheduling and billing, insurance submissions, accounting, financial management, and so forth. Like all ICS products, this powerful program was designed by an experienced team of data processing and healthcare professionals who understands the day-to-day demands of today's busy medical practice.

The beauty of this program is that it integrates a broad number of tasks into a single system, thereby significantly reducing administrative time. Not only will you find routine tasks such as patient scheduling and recall to be greatly simplified, you'll also have the ability to do things you've never had time for, like custom management reports and complete financial and clinical analysis. Despite the comprehensive nature of this program, it is surprising simple to learn and operate. Plus, its flexibility in design allows you to customize it to meet the unique needs of your practice.

HOW DOES THE MEDICAL PRACTICE MANAGER WORK?

The Medical Practice Manager is a complete system that can be loaded onto a wide range of UNIX®-based hardware configurations. Your administrative staff will follow simple-to-understand instructions to complete basic administrative functions, such as:

- Patient Billing
- Insurance Filing (electronic ready)
- Financial Reporting
- Patient Scheduling and Recall
- Referral Tracking
- Accounts Receivable
- Payment Tracking
- Patient and Clinical Analysis
- Credit Card Accounting
- Comprehensive Practice Management Reporting

The program also integrates with other ICS programs to provide word processing capabilities, expanded custom reporting, electronic claims submission, and more. A complete list of features is included on the reverse side of this product sheet.

Features

HOW WILL THE MEDICAL PRACTICE MANAGER BENEFIT MY PRACTICE?

The Medical Practice Manager offers a broad range of valuable and meaningful benefits for any healthcare practice. Here are just a few:

INCREASED CASH FLOW: The system's electronic billing and insurance filing capabilities mean that third-party reimbursements get into your hands faster. The program also allows you to automatically calculate and apply finance charges to overdue accounts, and to closely track and collect receivables.

BETTER OFFICE EFFICIENCY: **The Medical Practice Manager** will have an immediate impact on the efficiency of your office staff. Now, routine procedures that used to take many hours of administrative time can be accomplished with a touch of a computer key. Multi-location and multi-doctor billing can be handled with ease by a minimal support staff.

STRENGTHENED FINANCIAL POSITION: Because this system allows you to track receivables so closely and develop comprehensive practice management reports, you will be able to better manage your practice's cash flow and strengthen your financial position. And because you have a powerful reporting capability at your fingertips, you are better able to analyze your practice's financial profile, and make more informed management decisions.

UNSURPASSED SUPPORT AND SERVICE: ICS provides on-site training to your staff for all phases of running your system. New employees will be trained by our training specialists as requested. On an ongoing basis, ICS boasts one of the best customer training programs in the industry to help customers stay abreast of upgrades or to brush up on their skills. Finally, ICS offers a toll-free hotline for customers to call for prompt, courteous responses to all your questions.

PRODUCT TECHNICAL SPECS
